About Me

I am currently finishing my bachelors degree in software engineering where I considered I have gained a solid understanding of various programming concepts and software development methodologies. Also developed a few projects on my own where I explore different methods, languages and worlds! I am excited to continue my journey in the programming world and see what the future holds for me.

Last Experiences

BugsBytes (48H Hackathon) - Software Developer

Apr 2023 - Presential / Braga, Portugal

Performed as Frontend/Mobile Developer in a team of four members where we developed an application to help students to find new partners to study with.
